FOR IMMEDIATE RELEASE

The entire Richfield community is invited to help celebrate the Richfield Joint Recreation District's Lower Lake Dam Project Phase I completion at Richfield Heritage Preserve (4374 Broadview Road). A special reception in recognition of this major accomplishment will be held at Gund Hall on Saturday, November 23, 2019, at 2:00 p.m. Light refreshments will be offered.

The lower lake dam restoration project utilized a unique armoring technique and was the first time the Ohio Department of Natural Resources approved such an endeavor in the state.

This project would not have been possible without the professional oversight of Gannett Fleming Engineers and Architects (design engineer and project manager for the administration and monitoring of Phase I) and Black Horse Bridge Construction, Inc (contractor).

The residents of Richfield are encouraged to join with the Richfield Joint Recreation District board members on November 23 to commemorate this milestone in the park's development and restoration!
